

Travel to the 2021 IBSA General Assembly

All attendees at the 2021 IBSA General Assembly require a PCR test before arrival in Jordan.

Even if you have a European green passport, you must do a PCR test before entering Jordan.

Traveling instructions

There are three procedures you need to do before entering Jordan:

1. PCR test.
2. Complete the entry form for each person travelling to Jordan at <https://www.gateway2jordan.gov.jo/form/>
3. Save the QR code generated.

- The PCR test should be done within maximum 72 hours prior to departure.
- The passenger is required to apply on the above platform, even if he has a vaccination certificate, the system will show what the requirements are based on the information provided by him while applying.
- Arrivals at Queen Alia Airport are required to present the QR code they will receive, a negative PCR test from the departure country, and the vaccination certificate if found printed out, on the check in counter in the departure country.
- Children under 5 years old are not required to apply on the platform.
- In case of positive result, travellers must commit to adhere to home quarantine for a period of 7 days and do the (PCR)(COVID19) test on the seventh day of home quarantine at their own expense. During this application the traveller will sign an indemnity, and failure to comply with the quarantine requirements could result in legal prosecution under the defense order number 16.
